

The BLOBB is a super strong, UV stable and flexible resin designed to repair most *bodyboards, swimfins, wetsuits, traction pads* and many other materials.

Once applied, **The BLOBB** creeps into your repair and holds tight. Be patient because after 24 hours it dries so clear and flexible you'll hardly know it's there.

1. **Please read all directions before using.** Use in a well-ventilated area only. Surface should be clean, dry and free from dirt. Roughen surface before use. Best when used between 70°F (21°C) and 85°F (29°C). Test small area before full use.
2. Apply BLOBB directly to the area to be repaired. For maximum strength, allow bond to dry for 24-48 hours. Cure time increases with higher temperatures and decreases with lower temperatures. Speed drying time by using a hand-held hair dryer. Set on low and don't hold directly on BLOBB.
3. Clean uncured adhesive with acetone or naphtha. Cured material may be removed by cutting and scraping.
4. If BLOBB is used to adhere articles to fabric, **DO NOT DRY CLEAN FABRIC.**
5. **WARNING: BLOBB is not recommended for use on Styrofoam™, polystyrene, Syryn™, polyethylene or polypropylene plastics. Some bodyboard Mfg's. use these materials. Check with the manufacturer before use.**

CAUTION

Contains:Perchloroethylene.
Harmful if inhaled. May cause dizziness, headaches or nausea. Can cause skin And eye irritation.

WARNING:This product contains a chemical known to the state of California To cause cancer. Keep away from heat and flame. Contact with flame or hot Surface may produce toxic gasses.
