

Why Wait?

DING ALL
SUNcure

EPOXY SUN-CURE is a non colored, fiberfilled, epoxy resin that cures in "minutes" when exposed to the sun. **SUN-CURE** requires no mixing or adding and can cure in any temperature. **SUN-CURE** produces a tack-free surface that can be sanded in minutes.

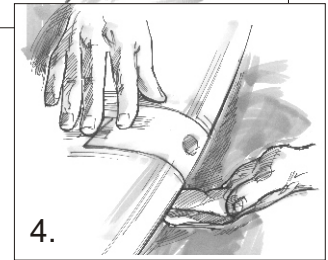

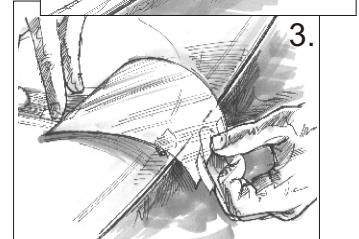

APPLICATION INSTRUCTIONS:
(Epoxy Sun Cure repairs both epoxy and polyester surfboards)

1. Clean the repair area and rough sand surrounding area.
2. IN THE SHADE, apply SUN-CURE to the repair.
3. Tape plastic coversheet over the repair
4. EXPOSE TO THE SUN:

Bright Sun: full cure 3 to 4 minutes
Partial Sun: full cure 5 to 7 minutes
Light overcast: full cure 7 to 10 minutes
(note: Expect a slower cure during winter)

WARNING: Contains Epoxy amines and Polyol. Keep away from heat or flames. Store in a cool place. Avoid prolonged breathing of vapor. Harmful if ingested, if ingested induce vomiting, consult a physician. Irritant to SKIN and EYES. In case of contact flush area with plenty of water. SUN-CURE cleans up with acetone. **KEEP OUT OF REACH OF CHILDREN.**

Made in U.S.A.
